MY PROFILE

With more than five years of experience in web development, I would like to increase my experience in IT field.

EXPERIENCE

Coding Expert

Outlier (Jan 2025 - Current)

- AI training, creation, evaluation and correction of prompts.
- User interfaces creation for LLM training with NextJS
- Use of AI-assisted development tools, such as Cursor for refactoring and debugging.

Fullstack web developer

Tata Consultancy Services (Aug 2020 - Jun 2024)

- Develop and maintain client's main web application using Next.js, React and Typescript for UI, as well as Express.js, Springboot and Mulesfot for backend.
- Implement and support RESTful services within a microservices architecture, building new endpoints and integrating them into frontend applications.
- Write and update unit tests to ensure code quality, reliability, and application stability.
- Collaborate with cross-functional teams in an Agile environment using Jira for task management and integration with Github flows as well as Confluence for documentation.

EDUCATION

Software Engineering

UTEL(Jan 2022 - Nov 2025)

- Focused on software development, programming, databases, and the design of information systems to solve real-world technological problems

Java Fullstack Web Development

Generation (Jan 2020 - Apr 2020)

- Front-end (JS, HTML, React, Bootstrap, CSS), Backend (Java EE) and Database (MySQL).
- Agile and Scrum methodologies and soft skills.
